

The image shows a large industrial facility filled with stacks of flat-rolled steel products. The top half of the image features several tall stacks of rectangular steel coils, some with a dark, possibly galvanized, finish. The bottom half shows more stacks of similar coils, but these appear to have a lighter, possibly aluminum-coated or stainless steel, finish. The perspective is from a low angle, looking down the length of the stacks, creating a sense of depth and scale. A red horizontal bar is positioned below the main title text.

Flat-Rolled Products

At our Lasalle facility, we transform coils with a combination of a temper mill and E-Drive Leveler that eliminates the steel's memory and produces laser quality plates or sheets.

OUR PRODUCTS AND CAPABILITIES

HOT ROLLED

16ga @ 5/8
Up to 72" wide

PICKLED AND OILED

16ga @ 3/8
Up to 72" wide

FLOOR PLATE

14ga @ 3/8
Up to 72" wide

In our Dorval facility, we recently installed a new Alcos Cut-to-Length line to ensure the highest precision and quality of cut.

OUR PRODUCTS AND CAPABILITIES

COLD ROLLED

24ga @ 11ga
Up to 72" wide

GALVANIZED

32ga @ 10ga
Up to 72" wide

GALVANNEAL

26ga @ 10ga
Up to 72" wide
